

Short-Term Study Abroad Program Vets-in-the-Wild Expeditions Pretoria, South Africa

Set departure dates:

28 November to 19 December 2010: SVET

16 January to 06 February 2011: VW06

12 June to 03 July 2011: VW01

19 June to 10 July 2011: VW02

17 July to 07 August 2011: VW03

25 July to 15 August 2011: VW04

27 November to 18 December 2011: VW05

Join us for the experience of a lifetime, a field study program in South Africa for students in veterinary fields and wildlife conservation

- Experience the world of wildlife conservation in Southern Africa, hands-on.
- Meet and interact with conservationists and wildlife veterinarians in the field.
- Learn about the crucial balance of people and wildlife in conservation today.
- Gain hands-on experience by taking part in game capture operations.
- Earn university credits for these programs.

About Our International Universities Programs

EcoLife Expeditions is an extension program of the **Centre for Wildlife Management, University of Pretoria** and has been conducting short-term field study programs for international students since 1999. Two study programs are currently presented, the *Vets-in-the-Wild* program and the *Wildlife Management* program.

Aimed at students of veterinary science and wildlife management, these study programs offer an exciting, hands-on, in-depth and educational experience, taking students behind-the-scenes in the wildlife field in Southern Africa. The expeditions are in the form of a camping safari and lodging, and the duration is around 3 weeks. Students interact with rangers, veterinarians and researchers working in the field, giving them an insight into life, successes and problems associated with conservation in Africa today. Participants also meet and learn from pioneers in game capture and those actively involved in the field of wildlife veterinary science on a day-to-day basis. The program includes a Capture and Care course where students participate in actual game capture operations.

This revised program is open to veterinary and pre-veterinary students, currently enrolled at a recognized tertiary educational institution, as well as to qualified professionals and also to interested persons. Qualifying students enroll for the **NLB 311 Ecosystems and Wildlife Management** and **NLB 312 Participatory Nature Conservation** courses at the Centre for Wildlife Management, University of Pretoria and receive **8 credits** on its successful completion.

Course Content:

- ❖ Wildlife Veterinary Science
- ❖ Wildlife Diseases and Medicine
- ❖ Capture and Care of Wild Animals
- ❖ Breeding of Rare Species
- ❖ Wildlife Rehabilitation

Itinerary

Day 1: Arrival

Students arrive and are welcomed at OR Tambo International Airport, Johannesburg, by EcoLife Staff Members. You are transferred to your guesthouse, close to the University of Pretoria, and relax before the evening welcoming dinner.

Accommodation: Pretoria Guest house

Day 2: Orientation, Pretoria and Lion Park

Our expedition starts by attending a morning workshop at the Center for Wildlife Management of the University of Pretoria. We meet with staff members who have been involved in the pioneering of wildlife management in Southern Africa, and learn about the latest developments in wilderness management. After lunch we visit a lion park to view lions up-close and even catch sight of a white lion. This is also your chance to get your hands on a lion cub!

Accommodation: Pretoria Guest house

Days 3 and 4: Community Veterinary Services

After breakfast we drive towards Soweto, the sprawling black city adjacent to Johannesburg where we join CLAW, (Community Led Animal Welfare), a world renowned group of dedicated animal lovers and veterinarians who volunteer their professional time and services to Black African townships to assist in the care of these people's domestic animals.

Accommodation: Pretoria Guest house

Days 5 - 8: Vet School and Wilderness Training

We visit the famous School of Veterinary Science of the University of Pretoria for an introduction to its renowned facilities. Then we turn east to a private camp in the Bushveld on the banks of the Loskop Reservoir. The wilderness reserve surrounding this lake is a pristine area in which to learn practical bush skills, track wildlife on foot and study wildlife behavior, and is perfect for learning how animals and man utilize plants. Weather permitting we will also do some abseiling.

Accommodation: Tented camp

Days 9 - 12: Kruger National Park

We depart after an early breakfast *en route* to the Lowveld and the Kruger National Park. The biodiversity of this jewel of wilderness areas, almost the size of Belgium, is spectacular. It is the ideal area for observing and studying most of the wildlife species Southern Africa has to offer. The greatest attraction of this magnificent Park is the opportunity to experience African game viewing at its best and to spot the Big Five. We enjoy a sunset game drive to observe the Park's inhabitant's behavior at night, drive along the Park's pristine rivers and perhaps go on an optional nature walk in the bush with experienced Park rangers to guide us. Park facilities include public telephones, a bank, a shop, restaurants and a laundry.

Accommodation: Camping

Day 13: Blyde Canyon Reserve: Swadini Resort

After a final game drive, exiting the Park, we arrive and establish our base at the beautiful Blydepoort Nature Reserve at the foot of the majestic northern Drakensberg Mountains (Mountains of the Dragon). The pristine Swadini Resort's facilities include public telephones, a shop, heated and ambient swimming pools, restaurants and a laundry.

Accommodation: Camping (Swadini)

Day 14: Reptile Centre and Wildlife Rehabilitation Centre

We attend a workshop presented on the handling and care of reptiles, including highly venomous snakes, and we also visit a world renowned wildlife rehabilitation centre. The care of a wide range of wildlife species will be experienced and demonstrated first hand.

Accommodation: Camping (Swadini)

Day 15: Drive to Brits

We depart early and take a scenic drive to Brits which is known for the numerous private game reserves and farms found in the area. Here we set up camp settle in for the night.

Accommodation: Camping

Days 16 - 19: Hands-on Game Capture Course

The successful capture, handling and translocation of wildlife all form important parts of the wildlife veterinarian’s program. The next four days are dedicated to observing and learning about and participating in actual game capture operations under the guidance of a veterinarian. We will, subject to the weather, also personally experience a mock darting exercise from a helicopter in flight. *(The area in which the game capture will take place will differ from group to group)*

Accommodation: Camping

Day 20: Sondela Nature Reserve

After an early rise to strike camp we commence our long drive through rural villages and pretty towns to arrive at Sondela to set up camp.

Accommodation: Camping

Day 21: Sondela Nature Reserve

After breakfast we visit a wildlife rehabilitation center, where we get the chance to interact with the sick, injured and orphaned animals. After lunch we will have enough time to write our exam. Our farewell dinner, followed by our graduation ceremony, is enjoyed under the stars around our last campfire.

Accommodation: Camping

Day 22: Departure

We depart for Johannesburg’s OR Tambo International Airport, in time for our flights home.

<p>Includes: Accommodation for the duration of the program Transportation for the duration of the program Airport transfers as stated Camping equipment Permits and entry fees All meals and group activities</p>	<p>Excludes: Air travel to and from South Africa Visa costs Optional additional activities Alcoholic beverages</p>
